worldwide integrated logistics and transport solutions

Garland has several differentiating features that abide by three fundamental pillars.

globality
multimodal
and integrated

solidity
growth and
reliability

flexibility
know-how and
innovation

Logistics

customised logistics

With over 160,000m² of storage capacity, Garland provides a complete package of logistics services, offering customers the total supply chain management as an outsourced operation.

flexible and integrated solutions

Garland provides complete logistics service of storage and order preparation including value-added services such as labelling, repackaging, quality inspection and component assembly.

All services complemented by a 24-hour national distribution including hanging garments.

fashion logistics

Garland provides specialized logistics solutions for the retail industry, such as textile, footwear and accessories.

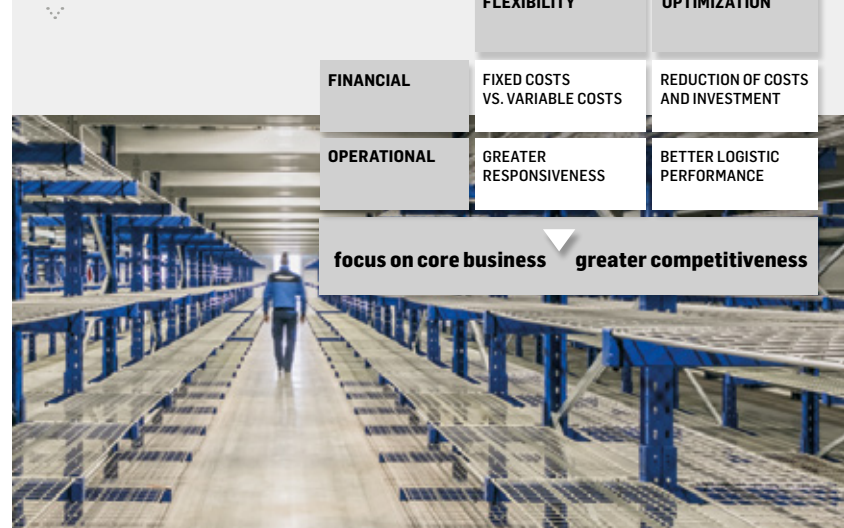

e-commerce logistics

Garland provides support logistics services to companies that wish to focus on e-commerce activities.

benefits of logistics outsourcing

Logistics outsourcing allows Garland's customers to focus on their core business and achieve greater competitiveness by increasing **FLEXIBILITY** and **OPTIMIZING RESOURCES**.

transport

global transportation by land, sea and air

Garland relies on an international network of agents, transporting goods across the globe, in full or partial loads, to/from offices in Portugal, Spain and Morocco.

Garland provides tailor made customer solutions.

overland transport

Garland transports full loads and groupage to/from all European destinations, as well as North Africa.

air cargo

Garland is an IATA certified member, offering quality air transport services from/to the main airports of Portugal, Morocco and Spain with the rest of the World.

Garland also offers customs clearance, documentation, storage, transport insurance, national distribution and express delivery services.

maritime forwarding

Garland offers maritime freight forwarding services from/to Portugal, Spain, Morocco and the rest of the world in full container loads and groupage.

dry and liquid bulk transport

Garland provides logistic services for bulk materials using global and multimodal transport solutions.

Garland's certified staff ensure the fulfilment of all essential and regulatory requirements on Security, Environment and Health. Certified by ISO 9001-2008, SQAS, GMP+, BBS and ISOPA.

special cargo transport

Garland has a specialized team dedicated to project cargo.

shipping

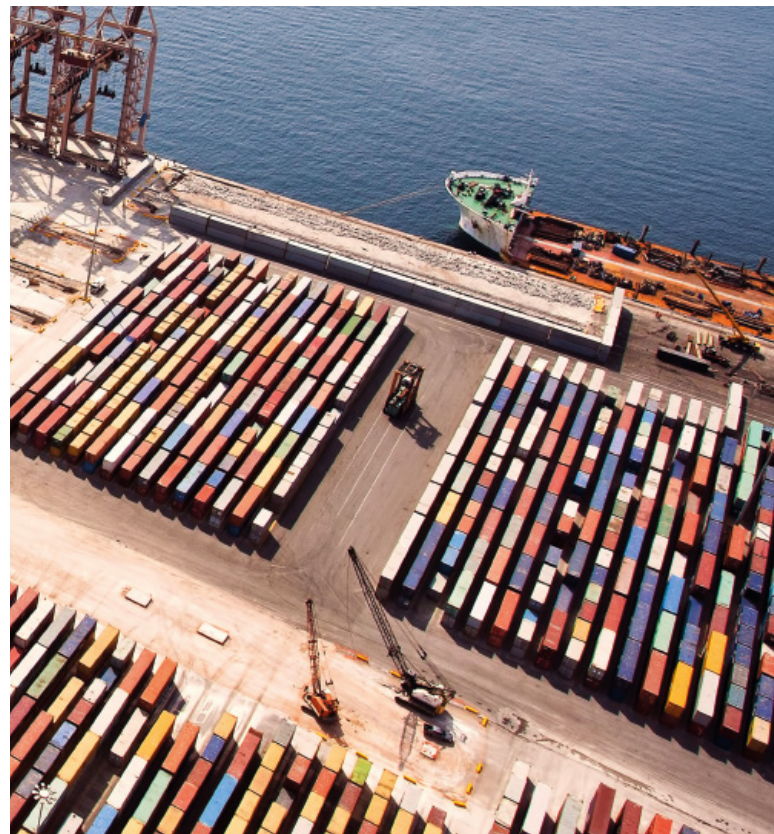

ship agents

Garland provides specialized shipping services under the brand names of Garland and Ocidenave.

It also provides customer support services in Portuguese and Spanish ports to all conventional vessels, cruise ships, tankers, military ships, offshore/scientific ships and large yachts.

Garland is the exclusive member of Multiport in continental Portugal.

corporate

group shared services, investment and shareholding management

Support services to all the business units, such as financial, legal, quality, human resources, marketing and information systems, are all centralized in a single corporate unit.

Garland is a shareholder in AnacondaWeb, based in Chile, dedicated to IT and datacentre services.

sustainability

Garland is strongly committed to sustainability practices, such as:

- Rational use of energy and water
- Generation of solar energy
- Recycling of materials
- Environmentally friendly logistics hubs
- Social responsibility within the community

technology

Garland is focused on optimizing and developing new solutions tailored to customer requirements and investing in the future for:

- Increased efficiency
- Visibility to customers and suppliers
- Continual improvement process
